## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: The examiner has reviewed the prior art in light of applicant's claimed invention and finds that the combined claims define over the prior art. The cited prior art does not disclose or suggest a method of manufacturing a semiconductor device inter alia the limitations "...generating a highly conductive layer of a highly conductive material on the further polycrystalline layer to form an emitter double layer with the same; effecting, via a temperature treatment, that at least part of the doping atoms of the second conductivity type of the polycrystalline layer get into the semiconductor substrate to electrically connect the base region to the polycrystalline layer; effecting that at least part of the doping atoms of the first conductivity type of the heavily doped further polycrystalline layer get into the basis region to generate an emitter region pf the first conductivity type; structuring the emitter double layer emitter terminal area; contacting the emitter terminal area with an contact terminal, wherein the layer and the contact terminal vary, comprising the following substeps: applying an insulating material on the emitter terminal area and etching a contact via into the insulating material, wherein the highly conductive layer in the emitter terminal area is effective as stop layer for the via etching...."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
